Dust Risk: Significant / Med / Low

Requirement: Dust generation must be minimized to ensure there is no health risk or loss of amenity and prevented on dry, windy days.

10. Minimizing Dust Generation:	12. Contingencies:
11. Dust Suppression:	13. Other:

Erosion and Sediment Risk: Significant / Med / Low

Requirement: Erosion and sediment must be managed in accordance with current best practice environmental management practices, to prevent sediment-laden water from entering any drainage system or natural waterway. Mud must not be transported on to nearby roads.

14. Drainage Management:	17. Sediment Traps:
15. Soil Stabilization: During Construction: Post Works:	18. Dewatering: 19. Vehicle and Road Management. Roads must be kept clean, to satisfaction of Council, at all times. Use only nominated access points. Site Access: 20. Other:
16. Stockpile Protection:	Cleaning Vehicles: Street Cleaning: Any material deposited on roadway to be swept up by means of shovel & broom or use of a street sweeper. Or as directed by an Authorized Council Officer. Using Street Sweeper as required and as directed by Authorized officer, any urgent cleaning may be undertaken by Council's contractor and the cost of this will be subtracted from the bond".

Waste Risk: Significant / Med / Low

Requirement: Litter and waste must be contained on site, before disposal in a responsible manner. Skip bins must have hinged lids and be kept closed each night and on wind affected days.

21. Movement of Soil: Of- site / On Site / N/A Contaminant Status:	23. Waste Storage and Disposal:
22. Waste Minimization Methods:	24. Other:

Chemicals Risk: Significant / Med / Low

Requirement: Storage and spill management practices must be implemented to ensure that no environmental damage can result from the escape or spillage of chemicals or fuels.
