

**INDIGENOUS PLANTS CURRENTLY IN STOCK DECEMBER 2024**
**RETAIL PRICING**

\$3.00 per 50mm tubestock

\$9.00 per 1.5L pot

\$30.00 per 250mm pot

Please contact us for bulk pricing.

**TRADE**

Wholesale pricing with valid Landscaping/Bush Regeneration ABN \$2.20 per 50mm tubestock.

**ENQUIRES**

 For any enquires, please either send an email to [nursery@mornpen.vic.gov.au](mailto:nursery@mornpen.vic.gov.au) or call 5974 8417 to speak to one of our staff.

**RETAIL HOURS:**

The Nursery is open Wednesday - Friday 9:00am -3:30pm and every FIRST Saturday of the month 9:00am-1:00pm

**CHRISTMAS AND NEW YEARS:** Please note we are closed from Wed Dec 18 and will reopen Wed January 15.

**SEMI-AQUATIC PLANTS**

| Size       | VARIETY                       | COMMON NAME             | LIGHT                      | INFO/ ENVIRONMENT   | FLOWER COLOUR            | FLOWER SEASON                 | HEIGHT   | WIDTH                   |
|------------|-------------------------------|-------------------------|----------------------------|---|--------------------------|-------------------------------|----------|-------------------------|
| Tube       | <b>Brachyscome paludicola</b> | Swamp Daisy             | Full sun-<br>Part shade    | Suitable for wet, well draining soils on the edges of ponds or wetlands. Supplementing water during dry periods will assist with optimal growth. Prune after flowering. Will tolerate coastal conditions. Source of food for insects and small birds. | White with Yellow centre | Sept- Jan                     | 0.5m     | 0.2m                    |
| Tube       | <b>Goodenia humilis</b>       | Swamp Goodenia          | Full Sun                   | Great matting plant for semi -moist, well drained soils. Can also be partially or fully submerged in water. Perfect for rockeries or the sides of ponds and dams.   | Yellow                   | Late Spring -<br>early Autumn | 0.2m     | Spreading<br>up to 1.5m |
| Tube       | <b>Hemarthria uncinata</b>    | Mat grass               | Full sun -<br>part shade   | Suitable for planting in seasonally wet areas and beside water ways. Great for erosion control of dams. Clay, loam, sand soils. Tolerates moderate frosts and drought.  | Green                    | Summer                        | 0.8m     | 0.5m                    |
| Tube       | <b>Juncus kraussii</b>        | Sea rush                | Full sun                   | Hardy rush great for erosion control of various soil types. Suited to salty environments. Important for biofiltration. Tolerates complete inundation as well as periods of drought.   | Brown                    | Spring -<br>summer            | 0.5-1m   | 0.5-1.5m                |
| Tube       | <b>Juncus pallidus</b>        | Pale rush               | Full sun-<br>part shade    | Suitable for seasonally wet to poorly draining soils. Great for use around pond and dam edges. Frog habitat. Seeds are also a food source for birds.  | Pale green               | Spring-<br>Summer             | 2m       | 1m                      |
| Tube<br>6" | <b>Lobelia aiceps</b>         | Angled lobelia          | Semi- full<br>shade        | Best suited to moist soil conditions, perfect for bog gardens, beside ponds and wetlands. Does not like inundation. Great frog habitat. Sensitive to frost.   | Light blue               | Year round                    | 0.3m     | spreading               |
| Tube       | <b>Marsilea drummondii</b>    | Nardoo                  | Full sun-<br>part<br>shade | Fast growing, spreading aquatic fern. Perfect for any damp- wet areas including ponds and dams. Important frog habitat. Attracts seed-eating birds  | NA                       | NA                            | 0.3m     | 3m                      |
| Tube       | <b>Mazus pumilio</b>          | Swamp mazus             | Full sun- full<br>shade    | Suited to moist- wet soils around pond/ wetland margins. Great to plant to create ground cover in moist areas. Can be sensitive to frost and drought.   | Purple                   | Spring-<br>Autumn             | 0.1m     | 1m                      |
| 6"         | <b>Ornduffia reniformis</b>   | Running marsh<br>flower | Full sun -<br>part shade   | A fresh water plant, suitable for submerging in still shallow ponds up to 60cm deep. Will die back if water receds. Provides habitat for frogs.   | Yellow                   | Spring-<br>Autumn             | 0.4m     | 1m                      |
| Tube       | <b>Persicaria decipiens</b>   | Slender<br>Knotweed     | Full sun -<br>part shade   | Beautiful spreading plant for moist- wet areas. Perfect for dams, ponds and seasonally wet areas. Great waterbird habitat.  | Pink                     | Summer -<br>Autumn            | 0.3-1m   | spreading               |
| Tube       | <b>Ranunculus inundatus</b>   | River buttercup         | Full sun -<br>part shade   | Requires moist soil. Perfect for ponds and dams. Can be planted beside ponds and dams, or partially submerged in shallow water. Tolerant of frost. Good frog habitat.   | Yellow                   | Spring-<br>Summer             | 0.1-0.3m | spreading               |

## SEMI-AQUATIC PLANTS

| Size | VARIETY                | COMMON NAME            | LIGHT                 | INFO/ ENVIRONMENT   | FLOWER COLOUR | FLOWER SEASON | HEIGHT    | WIDTH  |
|------|------------------------|------------------------|-----------------------|---|---------------|---------------|-----------|--------|
| Tube | <b>Thyridia repens</b> | Creeping monkey flower | Full sun - full shade | A wetland/ marsh plant suited to wet and boggy areas. Will tolerate salinity and inundation. Perfect to help bind soil on the edges of ponds. | Purple        | Spring-Autumn | Spreading | 0.5-1m |

## GROUNDCOVERS

| Size | VARIETY                       | COMMON NAME         | LIGHT                 | INFO/ ENVIRONMENT   | FLOWER COLOUR      | FLOWER SEASON | HEIGHT    | WIDTH         |
|------|-------------------------------|---------------------|-----------------------|---|--------------------|---------------|-----------|---------------|
| Tube | <b>Acaena novae-zelandiae</b> | Bidgie widgie       | Full sun-part shade   | Suited to any moist- dry soils. Soil binding and assists with moisture retention in soil. Produces sticky burrs that restrict foot traffic. Habitat for frogs.                  | Green              | Spring-Summer | Prostrate | 1-4m          |
| Tube | <b>Brachyscome multifida</b>  | Cut- leaf daisy     | Full sun-part shade   | A hardy groundcover shrub suited to moist-well drained soils. Can be grown in pots. Helps reduce soil erosion. Suited to underplanting. Attracts pollinating insects.           | Purple             | Year round    | 0.4m      | Spreading 1m+ |
| Tube | <b>Carpobrotus rossii</b>     | Pigface             | Full sun-part shade   | A fast growing, hardy groundcover best suited to coastal areas or dry/ well drained soils. Good for erosion control. Edible leaves and fruit. Important for pollinating insects | Pink               | Spring-Summer | 0.4m      | 3m            |
| Tube | <b>Chenopodium nutans</b>     | Nodding Saltbush    | Full sun - part shade | Tolerates a range of soils. Suited to exposed, coastal locations. Fast growing, creates a large mat that prevents weed growth. Important food source for birds and butterflies  | Green, red berries | Summer        | Spreading | 1-2m          |
| Tube | <b>Dichondra repens</b>       | Kidney weed         | Full sun-Full shade   | A hardy, readily spreading groundcover. Suited to moist- well drained soils. Will tolerate light foot traffic. May die back in full sun over summer. Frost tolerant             | Green              | Spring-Summer | 0.1m      | Spreading     |
| Tube | <b>Disphyma crassifolium</b>  | Rounded noon flower | Full sun - part shade | Tolerates drought and a range of soils, including low nutrients. Suited to exposed, dry and coastal locations.  | Pink               | All year      | Spreading | 1m            |
| Tube | <b>Kennedia prostrata</b>     | Running Postman     | Full sun - part shade | Perfect for groundcover, terraces or hanging. Suitable for pots. Tolerates dry soils once established, prefers a moist position with good drainage.                             | Red                | Spring        | Spreading | 1-2.5m        |
| 6"   | <b>Mentha australis</b>       | River mint          | Full sun-Full shade   | An indigenous edible mint. Will readily spread. Grows well in pots and responds well to regular pruning. Requires regular watering, suited to a moist position.                 | White/ Mauve       | Summer-Autumn | Spreading | Spreading     |
| Tube | <b>Tetragonia implexicoma</b> | Bower spinach       | Full sun - part shade | Suited best to dry, well draining soil. Perfect for coastal conditions. Fast growing. Good for stabilising soil including sand. Leaves are edible once cooked.                  | Yellow             | Winter-Summer | Spreading | 2m            |
| 6"   | <b>Wahlenbergia stricta</b>   | Tall bluebell       | Full sun - part shade | A beautiful indigenous bluebell. Tolerates well drained- moist conditions. Suitable for pots. Perfect for mass planting and cottage style gardens. Attracts butterflies         | Blue               | Winter-Summer | 0.9m      | 0.4m          |

## LILIES, GRASSES AND TUSSOCKS

| Size | VARIETY                      | COMMON NAME       | LIGHT                 | INFO/ ENVIRONMENT   | FLOWER COLOUR | FLOWER SEASON | HEIGHT | WIDTH |
|------|------------------------------|-------------------|-----------------------|---|---------------|---------------|--------|-------|
| Tube | <b>Austrostipa stipoides</b> | Coast spear grass | Full sun-part shade   | A hardy tussock grass suitable to sandy- loam soils. Resistent to drought and saline environemnts. Useful for binding soil. Provides food source for birds and habitat for other wildlife.                                    | White         | Spring-Summer | 1m     | 1m    |
| Tube | <b>Bulbine bulbosa</b>       | Bulbine lily      | Full sun - part shade | A fragrant flowering Lily suited to a range of soils from well draining- moist. Frost tolerant. Supplement water in dry conditions or dormany will occur. Corms (tubers) are edible. Suitable for pots. Attracts pollinators. | Yellow        | Spring-Autumn | 0.8m   | 0.5m  |

## LILIES, GRASSES AND TUSSOCKS

| Size    | VARIETY                         | COMMON NAME           | LIGHT                 | INFO/ ENVIRONMENT  | FLOWER COLOUR | FLOWER SEASON   | HEIGHT   | WIDTH  |
|---------|---------------------------------|-----------------------|-----------------------|--|---------------|-----------------|----------|--------|
| Tube    | <b>Dianella longifolia</b>      | Pale flax lily        | Full sun-part shade   | A versatile sedge suitable for moist- drier well drained soils. Can be used for underplanting. Flowers sit above leaves. Edible purple berries.  | Purple        | Winter- Spring  | 0.8m     | 0.5m   |
| Tube    | <b>Ficinia nodosa</b>           | Knobby club-rush      | Full sun - part shade | Grows well in most conditions with well-moderate soil drainage. Erosion control of sand. Suited to coastal areas. Drought and frost tolerant   | Spiky brown   | Spring - Summer | 0.5-1.5m | 0.5-2m |
| Tube 6" | <b>Lomandra longifolia</b>      | Mat rush              | Full sun-part shade   | A hardy sedge suited to most soils types, moist-dry conditions. Can tolerate periods of drought. Bushtucker plant, tubers are edible and seeds can be ground into flour. Attracts pollinators  | Yellow        | Spring & Winter | 1m       | 0.6m   |
| Tube    | <b>Poa labillardierei</b>       | Common Tussock grass  | Full sun - part shade | Very versatile grass that thrives in a range of soil types and environments. Prefers any well- draining soil. Trim annually after flowering.   | Cream         | Spring - Summer | 0.5 - 1m | 0.5-1m |
| Tube    | <b>Poa poiformis</b>            | Coastal tussock grass | Full sun-part shade   | A fast growing tussock suited to well drained sand or loam soils. Useful to prevent soil erosion. Attracts birds, important food and habitat for various insects and small lizards.  | Green/brown   | Spring-Summer   | 1m       | 1m     |
| Tube    | <b>Rytidosperma geniculatum</b> | Knead wallaby grass   | Full sun-Part shade   | Likes light moist- slightly dry soils. Useful for underplanting. Habbit is a smaller, finer leaved tussock. Could be planted as a lawn. Seeds provide food for birds   | Purplish      | Spring-Summer   | 0.4m     | 0.4m   |
| Tube    | <b>Rytidosperma laeve</b>       | Smooth wallaby grass  | Full sun-Part shade   | Best suited to moist soils, can be planted near water sources. Will tolerate seasonal inundation. Habit forms a small tussock. Would benefit from hard pruning in Autumn. Seeds provide food for birds.  | Purplish      | Spring-Summer   | 0.4m     | 0.4m   |
| Tube    | <b>Themeda triandra</b>         | Kangaroo grass        | Full sun-part shade   | A versatile grass suited to moist- well drained soils. A summer growing grass that is goof for fire retardant planting. Will tolerate light foot traffic. Requires pruning after flowering. Important food and habitat source for birds and insects. | Green/ brown  | Spring-Summer   | 0.7m     | 0.5m   |

## SMALL SHRUBS

| Size    | VARIETY                          | COMMON NAME       | LIGHT                 | INFO/ ENVIRONMENT   | FLOWER COLOUR | FLOWER SEASON        | HEIGHT   | WIDTH    |
|---------|----------------------------------|-------------------|-----------------------|---|---------------|----------------------|----------|----------|
| Tube    | <b>Amperea xiphioclada</b>       | Broom spurge      | Full sun - part shade | Prefers light (sandy), moist soil. Suited well to rockeries and planting under larger vegetation.   | Cream/ brown  | Spring-Summer        | 0.3-0.8m | 0.5m     |
| Tube    | <b>Atriplex cinerea</b>          | Coast saltbush    | Full sun - part shade | A larger saltbush suited to well- drained soils. Best suited to coastal conditions. Leaves are edible. Lightly prune after flowering. Attracts butterflies and birds.   | Purple        | Winter-Summer        | 1-2m     | 1-3m     |
| Tube 6" | <b>Atriplex paludosa</b>         | Marsh Saltbush    | Full sun - part shade | Very adaptable to most soil types and conditions. Tolerates salt, drought and frost. Important food source for caterpillars. Fire retardant   | Cream         | Spring               | 1-2m     | 1-2m     |
| Tube 6" | <b>Chenopodium candolleianum</b> | Seaberry Saltbush | Full sun - full shade | A spreading shrub, suited to dryer soils. Tolerates drought, lime, moderate frosts, soil salinity, salt spray and fire retardant. Fleshy berries are edible. Provides great habitat and food for birds, lizards and caterpillars. | Green         | Spring - summer      | 0.1 - 1m | 1.5 - 2m |
| Tube    | <b>Correa alba</b>               | White Correa      | Full sun - part shade | Extremely hardy, will tolerate most reasonably well-drained soils. Very resistant to salt spray. Suitable for pots and as hedge. Provides dense habitat for small mammals and animals. Attracts nectar eating birds and insects.  | White         | Late autumn - winter | 1.5m     | 1-1.5m   |

## SMALL SHRUBS

| Size | VARIETY                      | COMMON NAME        | LIGHT                 | INFO/ ENVIRONMENT   | FLOWER COLOUR                         | FLOWER SEASON        | HEIGHT | WIDTH |
|------|------------------------------|--------------------|-----------------------|---|---------------------------------------|----------------------|--------|-------|
| 6"   | <b>Correa reflexa</b>        | Common Correa      | Shade - full sun      | A hardy shrub that prefers partial shade. Will have a more open spreading habit in full shade. Suited to any well-draining soil. Attracts nectar eating birds.                                  | Yellow green or pink with yellow tips | Late autumn - spring | 1m     | 1.5m  |
| Tube | <b>Dillwynia glaberrima</b>  | Smooth parrot pea  | Full sun - part shade | Prefers dry, well-drained soils. Tolerant of frost. Suitable for planting under established trees.  | Yellow and red                        | Winter-summer        | 2m     | 2m    |
| Tube | <b>Indigofera australis</b>  | Austral Indigo     | Full sun - part shade | A hardy shrub suitable for a range of soils including nutrient poor. Frost and drought tolerant. Responds well to light pruning. Important nectar source for insects.                           | Purple                                | Spring               | 1-2.5m | 1-2m  |
| 6"   | <b>Ozothamnus turbinatus</b> | Coast everlasting  | Full sun - part shade | Likes well drained soils, suited to coastal areas. Useful for erosion control. Salt and drought tolerant. Important food source for pollinating insects.  | White                                 | Summer               | 1.2m   | 1.2m  |
| 6"   | <b>Leucophyta brownii</b>    | cushion bush       | Full sun - part shade | A hardy shrub, suited to a range of soils types and nutrient poor conditions. Low maintenance. Will tolerate salt, wind and drought. Provides great shelter for small ground dwelling wildlife. | White/ cream                          | Summer               | 1.2    | 1.2   |
| 6"   | <b>Lythrum salicaria</b>     | Purple Loosestrife | Full sun - part shade | An attractive wetland plant suited to moist-wet conditions along ponds, dams and other waterways. Suitable for growing in pots. Food source for caterpillars and butterflies insects.           | Pink                                  | Summer               | 1.5m   | 1m    |

## LARGE TREES AND SHRUBS

| Size  | VARIETY                         | COMMON NAME                 | LIGHT                 | INFO/ ENVIRONMENT   | FLOWER COLOUR             | FLOWER SEASON         | HEIGHT | WIDTH |
|-------|---------------------------------|-----------------------------|-----------------------|---|---------------------------|-----------------------|--------|-------|
| Tube  | <b>Acacia implexa</b>           | Lightwood or Hickory Wattle | Full sun - part shade | Fast growing, prefers drier, shallow soils but highly adaptable. Perfect as a windbreak, shade and tall screening plant. A longer-lived Acacia. Attracts insects to feed native birds                           | Ball shaped cream flowers | Summer                | 5-15m  | 4-7m  |
| Tube  | <b>Acacia mearnsii</b>          | Black Wattle                | Full sun-part shade   | A fast growing tree. Requires well draining soil. Drought tolerant. Strong perfume in spring. Useful as a shade tree. Bird attracting.  | Pale yellow.              | Spring-Summer         | 8-25m  | 6-10m |
| Tube  | <b>Acacia melanoxylon</b>       | Black wood                  | Full sun-part shade   | A fast growing, longer lived wattle suited to most soil types. A good shade tree and revegetation plant. Tolerant of drought, fire, frost and soil salinity. Food for birds and insects including caterpillars. | Yellow                    | Winter- Spring        | 20m    | 5m    |
| Tube  | <b>Acacia paradoxa</b>          | Hedge Wattle                | Full sun - part shade | Tolerates both dry and moist soils. A prickly shrub, great for screening. Excellent food source and refuge and habitat for many birds and mammals.  | Yellow                    | Late winter - spring  | 2m-4m  | 2-5m  |
| Tube  | <b>Acacia suaveolens</b>        | Sweet Wattle                | Full sun - part shade | A small spreading Acacia suited to many soils, particularly sand or sandstone soils. Suited to coastal conditions. Frost resistant. Suitable as a low screen. Attracts birds and bees.                          | Pale yellow               | Autumn - early spring | 1-3m   | 1-5m  |
| Tube  | <b>Acacia verticillata</b>      | Prickly moses               | Full sun- full shade  | A dense shrub suited to a variety of moist-wet soils. Will tolerate both waterlogging in winter and drying out in summer. Important refuge for birds. Responds well to pruning.                                 | Yellow                    | Winter-Summer         | 2-5m   | 3-5m  |
| 250mm | <b>Allocasuarina littoralis</b> | Black Sheoke                | Full sun              | A fast-growing sheoak species suited to sunny positions in well-drained soil. Suitable to both inland and coastal areas. Important food source for black cockatoos.   | Red                       | Spring                | 5-8m   | 2-4m  |

## LARGE TREES AND SHRUBS

| Size          | VARIETY                                    | COMMON NAME              | LIGHT                 | INFO/ ENVIRONMENT   | FLOWER COLOUR          | FLOWER SEASON   | HEIGHT | WIDTH    |
|---------------|--|--------------------------|-----------------------|---|------------------------|-----------------|--------|----------|
| Tube<br>250mm | <b>Acacia verticilata</b>                  | Prickly moses            | Full sun- full shade  | A fast- growing sheoak species suited to sunny positions in well- drained soil. Naturally grows in coastal areas, but also suited to inland environemnts. Important food source for black cockatoos.                          | Yellow                 | Winter-Summer   | 2-5m   | 3-5m     |
| Tube          | <b>Alyxia buxifolia</b>                    | Sea-box                  | Full sun - part shade | Requires well drained soils. Tolerates salt winds. Grows best in alkaline- neutral soil environments. Important habitat and refuge for birds, insects and reptiles.   | White (orange berries) | Spring-Autumn   | 1-3m   | 1-3m     |
| Tube          | <b>Banksia integrifolia</b>                | Coastal banksia          | Full sun - part shade | A hardy tree sutied to most well- draining soil, including low nutrient and coastal conditions. Frost and drought tolerant. Food source for birds, insects and mammals.   | Yellow                 | Autumn-winter   | 10-20m | 4m       |
| Tube          | <b>Cassinia aculeata</b>                   | Common Cassinia          | Part shade            | Heavy to moist well drained soils. Easily established under eucalypts. Prune to keep foliage dense. Food source for insects and birds   | White                  | Spring-Summer   | 2-4m   | 1-2m     |
| Tube          | <b>Eucalyptus cephalocarpa</b>             | Silver leaf              | Ful sun- part shade   | Suited to moist sandy- poor draining clay soils. Will tolerate drying out in summer. A good food and habitat tree for wildlife. Good for honey production.  | Cream                  | Autumn-Winter   | 20m    | 5-15m    |
| 250mm         | <b>Eucalyptus ovata</b>                    | Swamp Gum                | Full sun              | A large indigenous Eucalypt. Prefers clay, loam or sand soils which are poorly drained in cooler months. Tolerates drought and frost. Provides important food and habitat for a variety of wildlife                           | White                  | Autumn, winter  | 6-25m  | 5 - 15m  |
| 250mm         | <b>Eucalyptus pauciflora</b>               | Snow gum                 | Full sun              | Prefers well- drained clay- loam soils. Tolerates drought and major frosts. Great for a shade tree. Good for honey production. Important food and habitat for a variety of wildlife   | White                  | Spring - summer | 8-30m  | 5m - 12m |
| Tube<br>250mm | <b>Eucalyptus radiata</b>                  | Narrow-leaved Peppermint | Full sun- part shade  | Tolerates highly fertile - poor soils. Prefers well draining- dry soils. Tolerates frost. Good food and habitat for a variety of wildlife   | White                  | Spring - summer | 15-25m | 8 - 12m  |
| Tube<br>250mm | <b>Eucalyptus viminalis var. pryoriana</b> | Coastal manna gum        | Full sun - part shade | A subspecies of 'E. viminalis' that occurs coastally. Suited to a range of soil types. Drought tolerant. Important habitat and food for nectar feeding birds and mammals.   | White                  | Summer-Autumn   | 25m    | 10m      |
| Tube          | <b>Goodea lotifolia</b>                    | Golden tip               | Full sun - part shade | A fast growing srub suited to well- drained, dry- moist soil. Performs well in distrubed and poor soils. Responds well to pruning after floweing. Important food source for insects such as caterpillars.                     | Yellow                 | Spring          | 1-5m   | 1-5m     |
| 6"            | <b>Hakea nodosa</b>                        | Yellow Hakea             | Full sun - full shade | Suited to moist or wet soils, will adapt to seasonally dry periods. Suitable for underplanting. Frost tolerant. Provides nectar for birds and insect pollinators.   | Yellow                 | Autumn-winter   | 3m     | 2m       |
| Tube          | <b>Leptospermum continentale</b>           | Prickly Tea tree         | Full sun - part shade | Suitable for well- drained to moist sandy to light clay soil. Naturally occurs in woodlands, heathlands and near water sources. Can be pruned hard and kept narrow. Important habitat plant and food                          | White                  | Spring-Autumn   | 4m     | 2m       |
| Tube          | <b>Leptospermum laevigatum</b>             | Coast Tea-tree           | Full sun - part shade | A very hardy shrub suited to most soil types. Suitable windbreak and hedge. Tolerates salt spray and frost. Perfect for planting within it's natural range, can become weedy otherwise. Attracts birds and other pollinators. | White                  | Summer          | 5m     | 3m       |
| 250mm         | <b>Leptospermum lanigerum</b>              | Woolly Teatree           | Full sun - part shade | Suited to moist- wet conditions. Perfect for planting in boggy areas or near embankments. Will tolerate drier conditions. Useful as a screening plant. Responds well to pruning. Food source for insects and birds.           | White                  | Spring-Summer   | 2- 6m  | 1- 3m    |

## LARGE TREES AND SHRUBS

| Size       | VARIETY                      | COMMON NAME        | LIGHT                 | INFO/ ENVIRONMENT   | FLOWER COLOUR | FLOWER SEASON   | HEIGHT | WIDTH  |
|------------|------------------------------|--------------------|-----------------------|---|---------------|-----------------|--------|--------|
| Tube       | <b>Melaleuca lanceolata</b>  | Moonah             | Full sun - part shade | A hardy small tree, highly tolerant of most conditions. Best suited to coastal sites in any well- draining soil. Tolerant of wind, drought, salt, lime and frost                            | White         | Spring, summer  | 3-8m   | 3-5m   |
| Tube       | <b>Melaleuca squarrosa</b>   | Scented Paperbark  | Full sun - part shade | Grows best in damp, swampy soils. Tolerant of frost. Responds well to pruning. Flowers are highly scented. Attracts pollinators.  | Cream         | Spring - Summer | 2-10m  | 1 - 2m |
| Tube       | <b>Olearia lirata</b>        | Snow daisy bush    | Part- full shade      | Suited to moist, well drained soils in a shady position. Tolerant of frosts. Useful as a light screen. Food source for caterpillars.  | White         | Winter-Summer   | 4m     | 3m     |
| Tube       | <b>Pomaderris paniculosa</b> | Coast pomedarris   | Full sun - part shade | Best suited to coastal conditions. Needs well draining soil. Great for hedging and protection from coastal winds. Suitable for poor nutrient soils. Attracts birds.                         | Pink          | Spring          | 1-3m   | 1-2m   |
| Tube       | <b>Solanum aviculare</b>     | Red Kangaroo apple | Full sun - part shade | A fast growing pioneer plant with striking purple flowers and red berries. Perfect for a quick growing statement plant. Attracts frugivore birds. Berries poisonous when unripe             | Purple        | Spring-Summer   | 1-3m   | 1-4m   |
| Tube 250mm | <b>Viminaria juncea</b>      | Golden Spray       | Full sun - part shade | Fast growing shrub for poorly drained areas. Useful as a large foliage near wet areas including pools. Requires summer watering in drier conditions. Attracts insect pollinators and birds. | Yellow        | Summer          | 2.5-5m | 2-2.5m |
