In summary, my comments are:

The Balcombe Estuary is certainly the most beautiful of the many natural areas on the peninsula near Mornington - in part because of its lovely river flowing through largely intact woodland. It is unique also, in being substantial in size, but also very accessible to large numbers of people. That accessibility is both a huge plus, and also a substantial threat! It must be protected from further intrusion of housing development, and from any more than minor updates to recreational access, or routine maintenance of existing facilities such as paths. The excellent work of existing friends groups must continue to be supported, and supplemented where necessary by the shire.

In summary, my comments are:

This amendment is essential to protect this irreplaceable asset both now and into the future for generations to come. We have lost far too much precious environment and cannot afford to lose any more. Thank you.

How would the proposal affect you?

Other (please specify) - I lived in Mt Martha for a long time, and have spent hours/years at working bees in Balcombe Reserves. I want to protect the plant and bird life for all to enjoy into the future. I have led guided birdwatching walks in the Reserves to educate young and old of the extensive variety of birds resident and visiting.

In summary, my comments are:

Balcombe Reserves are a community environmental resource of great value, and need to be protected at all costs for future and present generations.

In summary, my comments are:

This area is an irreplaceable asset to the Peninsula that needs to be preserved and protected for both humans and wildlife. So little native vegetation left in the area so we need to do all that we can to protect what is left. It is such a beautiful area that is loved and visited by so many people, both locals and visitors. We need to protect it for future generations to enjoy as we do now.

In summary, my comments are:

The Balcolm Creek Estuary should be protected as much as possible for present and future generations. Natural areas on the Mornington Peninsula are being damaged by development and environmental factors - we must preserve as much as we can or lose these areas forever

In summary, my comments are:

The Balcombe Estuary is one of the only estuaries in Port Philip Bay that opens and closes. It has significant biological importance and is home to many species of flora and fauna. It needs protection.

In summary, my comments are:

I strongly support the overlay amendment. As a frequent walker along the estuary (weekly at least) I have observed the importance of this green zone to the local bird life. The Balcombe Ck estuary is environmentally significant in the context of Port Philip Bay, being likely the only estuary the opens and closes more or less naturally.

Yes

Who do you represent?

My wife.

Do you have written consent from these people for you to represent them?

No

How would the proposal affect you?

I am a neighbour

In summary, my comments are:

As ex-president of Berg MtMartha, and responsible for starting the process within BERG MM, it is great to see that this ESO application has been supported already by: - BERG MT Martha (500 members) - the Shire of Mornington - the State Government of Victoria To find that it is now back for consultation by the Shire and not just for information is quite disappointing. I hope and we hope that this is just 'procedural'. But I know how these processes work and know they can be stopped at any point in the chain. My letter is to

reiterate that all the arguments for the ESO have already been made, been accepted, by several levels of administration. Please ensure these arguments are not impacted by any last minute objections by self-interested developers or real estate agents or private owners. We increasingly know the importance of all green spaces to the future of this planet, this state, this town. Do the right thing. Without fuss or delay.
