

HOW TO CHECK THE VACCINATION STATUS OF FAMILIES

Parents and guardians can now add the COVID-19 digital certificates of everyone on their Medicare card to their Service Victoria app.

The new feature is an easy way for businesses to check the vaccination status of family groups — just by checking one smartphone.

- If the people they've checked in have their certificate added, you'll see their name, a green tick on a white background and **'Valid certificate'**.
- If they've checked in and don't have their certificate added, you'll see their name, question mark in a red circle and **'No certificate'**.

A printed COVID-19 digital certificate or a downloaded immunisation history statement are all also acceptable proof of vaccination status.
