HABITAT	VARIETY	COMMON NAME	LIGHT	INFO / ENVIRONMENT	FLOWER COLOUR	FLOWER SEASON	HEIGHT	WIDTH	Tube	150mm	250mm
Climber	Clematis aristata	Old Man's Beard	Part- full shade	An attractive creeper for terraces or ground cover. Female plants produce white, fluffy fruits. Prefers deep, cool soil. Liberally mulch with leaf litter.	Creamy white	Spring-Summer	Climbing	3m	Yes		
Climber	Clematis microphylla	Small-leaved clematis	Full sun - part shade	A dainty climber for fences and screen areas. Will smother small plants in a garden bed. Foliage tends to be along the top of the creeper. Good habitat for bird nesting.	Creamy white	Winter- Spring	Climbing	5m	Yes		
Climber	Muehlenbeckia adpressa	Climbing Lignum	Full sun - part shade	A fast growing groundcover and climber well suited to coastal conditions and nutrient poor soils. Likes well drained soils. Great as a screening plant on fencing. Requires pruning to control growth. Provides great habitat.	Yellow	All year	Spreading	Spreading	Yes		
Climber	Rubus parviflorus	Thimbleberry	Full sun - part shade	Deciduous shrub with large maple-like leaves. Suitable to moist well drained soils. Edible fruits, attracts birds and mammals.	White	Spring - Summer	1 - 2.5m	Spreading	Yes	Yes	
Groundcover	Acaena novae-zelandiae	Bidgie widgie	Full sun- part shade	Suited to any moist- dry soils. Soil binding and assists with moisture retention in soil. Produces sticky burrs that restrict foot traffic. Habitat for frogs.	Green	Spring-Summer	Prostrate	1-4m	Yes		
Groundcover	Apium prostratum	Sea celery	Full sun- part shade	Low, perennial herb, requiring moist well drained sandy, loamy or clay soils. Tolerate saline soils. Edible leaves and stems.	White to green	Spring - Summer	20 - 60cm	Spreading	Yes		
Groundcover	Billardiera scandens	Common Apple-berry	Full sun- part shade	Tolerates a range of conditions, including frost, well-moderately drained soils. Climber, ground cover or low shrub. Attracts nectar- feeding birds.	Bright yellow-green (Green-purple berries)	Year round, peaking in Spring	Climbing	Up to 3m	Yes		
Groundcover	Brachyscome multifida	Cut- leaf daisy	Full sun- part shade	A hardy groundcover shrub suited to moist- well drained soils. Can be grown in pots. Helps reduce soil erosion. Suited to underplanting. Attracts pollinating insects.	Purple	Year round, peaking in Spring-summer	0.4m	Spreading 1m+	Yes	Yes	
Groundcover	Calocephalus lacteus	Mily beauty heads	Full sun - part shade	Low maintenance groundcover, butterfly and insect attracting	White	Spring-Summer	0.2m	Spreading	Yes		

Groundcover	Carpobrotus rossii	Pigface	Full sun- part shade	A fast growing, hardy groundcover best suited to coastal areas or dry/ well drained soils. Good for erosion control. Edible leaves and fruit. Important for pollinating insects	Pink	Spring-Summer	0.4m	3m	Yes		
Groundcover	Convolvulus euribes	Pink bindweed	Full Sun	Dry tolerant native groundcover with oval green leaves and funnel shaped candy pink flowers that bloom continuously through the warmer months.	Pink	Spring - Summer	0.3m	1m	Yes		
Groundcover	Cynoglossum australe	Australian Hounds tongue	Full sun- part shade	Suitable in a diverse range of habitats. Can be used as a rockery plant in a full-sun or semi-shade position. Prefers well-drained soils	Blue/pink/white	Spring-Summer	0.7m	0.5 - 2m		Yes	
Groundcover	Dichondra repens	Kidney weed	Full sun- Full shade	A hardy, readily spreading groundcover. Suited to moist- well drained soils. Will tolerate light foot traffic. May die back in full sun over summer. Frost tolerant	Green (inconspicuous)	Spring-Summer	0.1m	Spreading	Yes		
Groundcover	Disphyma crassifolium	Rounded noon flower	Full sun - part shade	Tolerates drought and a range of soils, including low nutrients. Suited to exposed, dry and coastal locations.	Pink	All year - main flush spring - summer	Spreading	1m	Yes		
Groundcover	Enchylaena tomentosa	Ruby Salt-bush	Full sun - part shade	A drought resistant groundcover. Readily spreads. Edible berries. Tolerates poor soils. Good for erosion control	Insignificant flowers with red/yellow berries	Spring - autumn	Spreading	0.5-1m	Yes	Yes	
Groundcover	Eutaxia microphylla	Small-leaved Eutaxia	Full sun	A hardy plant suited to most soil types including nutrient poor sand. Can tolerate extended dry periods. Responds well to pruning. An important caterpillar food plant.	Red and yellow	Spring	0.3m	1.5m	Yes		
Groundcover	Goodenia ovata prostrata	Prostrate goodenia	Full sun - part shade	A hardy, readily spreading groundcover suited to well-moderately drained soils. Suited to pots. Good for erosion control. Attracts insect pollinators. Frost tolerant.	Yellow	Spring-Summer	Spreading	1m	Yes	Yes	
Groundcover	Kennedia prostrata	Running Postman	Full sun - part shade	Perfect for groundcover, terraces or hanging. Suitable for pots. Tolerates dry soils once established, prefers a moist position with good drainage.	Red	Spring	Spreading	1-2.5m	Yes		
Groundcover	Lagenophora stipitata	Blue- bottle daisy	Part shade- Full shade	Suited to moist or seasonally drier, well draining soil. Hardy when in the right conditions. Perfect for sheltered conditions, underplanting or in pots. Supplement water over summer.	White	Spring-Summer	0.15m	spreading	Yes	Yes	
Groundcover	Linum marginale	Native flax	Full sun- Part shade	A grass- like groundcover suited to most well- draining soil. Tolerates frost and drought. Will die back over summer and reshoot. Seeds are edible and stem produces 'flax' fibres.	Blue	Spring	0.3m	0.6m	Yes	Yes	
Groundcover	Mentha australis	River mint	Full sun- Full shade	An indigenous edible mint. Will readily spread. Grows well in pots and responds well to regular pruning. Requires regular watering, suited to a moist position.	White/ Mauve	Summer-Autumn	Spreading	Spreading	Yes	Yes	

Groundcover	Podolepis jaceoides	Showy copper wire daisy	Full Sun	Grows in heavy clay to sandy soils. Hardy, coping with frost and drought.	Yellow	Spring - Summer	0.4m	0.4m	Yes		
Groundcover	Swainsona lessertifolia	Coast Swainson-pea	Full sun	Low growing perennial herb, suitable to sandy well-drained soils. Attracts pollinators. Nitrogen fixing.	Purple	Spring - Summer	0.2 - 0.5m	Spreading	Yes		
Groundcover	Tetragonia implexicoma	Bower spinach	Full sun - part shade	Suited best to dry, well draining soil. Perfect for coastal conditions. Fast growing. Good for stabilising soil including sand. Leaves are edible once cooked.	Yellow	Winter-Summer	Spreading	2m	Yes		
Groundcover	Viola eminens	Stately Violet	Semi shade- Full shade	A low growing ground cover best suited to moist positions. Great for a low traffic lawns, pots, between pavers or stepping stones. Provides habitat for frogs. Flowers are edible.	Purple	Winter-Summer	Spreading	Spreading	Yes		
Large trees and shrubs	Acacia mearnsii	Black Wattle	Full sun-part shade	A fast growing tree. Requires well draining soil. Drought tolerant. Strong perfume in spring. Useful as a shade tree. Bird attracting.	Pale yellow.	Spring-Summer	8-25m	6-10m		Yes	Yes
Large trees and shrubs	Acacia melanoxylon	Black wood	Full sun-part shade	A fast growing, longer lived wattle suited to most soil types. A good shade tree and revegetation plant. Tolerant of drought, fire, frost and soil salinity. Food for birds and insects including caterpillars.	Yellow	Winter- Spring	20m	5m	Yes		
Large trees and shrubs	Acacia myrtifolia	Myrtle wattle	Full sun - part shade	Prefers well- drained clay, loam or sand soils. Tolerates drought. Short lived but fast growing. Bird attracting.	Yellow	Spring	1-3m	2-3m	Yes		
Large trees and shrubs	Acacia paradoxa	Hedge Wattle	Full sun - part shade	Tolerates both dry and moist soils. A prickly shrub, great for screening. Excellent food source and refuge and habitat for many birds and mammals.	Yellow	Late winter - spring	2m-4m	2-5m	Yes		
Large trees and shrubs	Acacia sophorae	Coast wattle	Full sun - part shade	A low growing Acacia mainly found along the coast. A hardy plant in most well- draining soils. Suitable as a hedge and can be kept prostrate. Frost tolerant.	Yellow	Winter- Spring	3m	3m	Yes		
Large trees and shrubs	Acacia suaveolens	Sweet Wattle	Full sun - part shade	A small spreading Acacia suited to many soils, particularly sand or sandstone soils. Suited to coastal conditions. Frost resistant. Suitable as a low screen. Attracts birds and bees.	Pale yellow	Autumn - early spring	1-3m	1-5m		Yes	
Large trees and shrubs	Acacia verticillata	Prickly moses	Full sun- full shade	A fast- growing sheoak species suited to sunny positions in well- drained soil. Naturally grows in coastal areas, but also suited to inland environments. Important food source for black cockatoos.	Yellow	Winter-Summer	2-5m	3-5m	Yes	Yes	
Large trees and shrubs	Allocasuarina littoralis	Black Sheoak	Full sun	A fast- growing sheoak species suited to sunny positions in well- drained soil. Suitable to both inland and coastal areas. Important food source for black cockatoos.	Red	Spring	5-8m	2-4m	Yes	Yes	Yes
Large trees and shrubs	Allocasuarina verticillata	Drooping sheoak	Full sun	A medium tree suited to most soils types. Particularly suited to coastal conditions. Can be used as a ornamental or shade tree, as well as a large screen. Habitat for many animals, food source for black cockatoos.	Red	Autumn-Winter	8m	4m	Yes	Yes	Yes

Large trees and shrubs	Bursaria spinosa	Sweet bursaria	Full sun - part shade	A fast growing, hardy shrub suited to a range of well- draining soil types and conditions. Can be kept as a small shrub, or left to grow into a small tree. Aromatic when in flower. Spiny branches provide protection for wildlife, and provides nectar to birds and insects	White	Summer	4m	3m	Yes		
Large trees and shrubs	Dodonaea viscosa	Sticky Hop-bush	Full sun - part shade	A hardy shrub perfect for screening. Prefers well-drained soils. Tolerates drought and light frosts. Responds well to pruning. Habitat for bush birds.	Inconspicuous	Spring - summer	1.5m - 4m	1-2m		Yes	
Large trees and shrubs	Eucalyptus carolanae	Mt Martha Bundy	Full sun - part shade	This species of eucalyptus is endemic to Mount Martha. It is a special, critically endangered species first described in 2012. Growing conditions similar to other local Eucalyptus species.	White	Summer	up to 20m	5m	Yes		
Large trees and shrubs	Eucalyptus cephalocarpa	Silver leaf	Full sun - part shade	Suited to moist sandy- poor draining clay soils. Will tolerate drying out in summer. A good food and habitat tree for wildlife. Good for honey production.	Cream	Autumn- Winter	20m	5-15m			Yes
Large trees and shrubs	Eucalyptus obliqua	Swamp gum	Full sun - part shade	A fast growing, upright canopy tree. Suited to poor, moist soils. Tolerates both inundation and drought. Important habitat and food source for native birds, insects and marsupials.	White	Autumn- Spring	25m	10m			Yes
Large trees and shrubs	Eucalyptus ovata	Swamp Gum	Full sun	A large indigenous Eucalypt. Prefers clay, loam or sand soils which are poorly drained in cooler months. Tolerates drought and frost. Provides important food and habitat for a variety of wildlife	White	Autumn, winter	6-25m	5 - 15m	Yes	Yes	Yes
Large trees and shrubs	Eucalyptus radiata	Narrow-leaved Peppermint	Full sun - part shade	Tolerates highly fertile - poor soils. Prefers well draining- dry soils. Tolerates frost. Good food and habitat for a variety of wildlife	White	Spring - summer	15-25m	8 - 12m			Yes
Large trees and shrubs	Eucalyptus viminalis	Mana gum	Full sun - part shade	A large gumtree, suited to a range of soil conditions. Drought tolerant. Important habitat and food for nectar feeding birds and mammals.	White	Summer- Autumn	30m	15m	Yes		
Large trees and shrubs	Eucalyptus viminalis var. pryoriana	Coastal manna gum	Full sun - part shade	A subspecies of 'E. viminalis' that occurs coastally. Suited to a range of soil types. Drought tolerant. Important habitat and food for nectar feeding birds and mammals.	White	Summer- Autumn	25m	10m		Yes	
Large trees and shrubs	Goodia lotifolia	Golden tip	Full sun - part shade	A fast growing shrub suited to well- drained, dry- moist soil. Performs well in disturbed and poor soils. Responds well to pruning after flowering. Important food source for insects such as caterpillars.	Yellow	Spring	1-5m	1-5m	Yes	Yes	
Large trees and shrubs	Hakea decurrens	bushy needlewood	Full sun - part shade	A large shrub suited to moist- well draining soils. Hardy in most conditions. Tolerant of frost. Spiny foliage provides protection for wildlife, and flowers provide nectar to birds and insects.	White	Autumn- Spring	1-5m	1-3m	Yes		
Large trees and shrubs	Hakea ulicina	Furze Hakea	Full sun - part shade	Suited to dry- moist, well drained soils. Will tolerate heavy frost. Perfect for a feature plant or group planting. Suitable as an informal hedge. Provides nectar for birds and insect pollinators.	Cream	Winter- Spring	1-3m	1-2m	Yes		

Large trees and shrubs	Leptospermum continentale	Prickly Tea tree	Full sun - part shade	Suitable for well- drained to moist sandy to light clay soil. Naturally occurs in woodlands, heathlands and near water sources. Can be pruned hard and kept narrow. Important habitat plant, and food for insects and birds.	White	Spring- Autumn	4m	2m	Yes	Yes	
Large trees and shrubs	Leptospermum lanigerum	Woolly Teatree	Full sun - part shade	Suited to moist- wet conditions. Perfect for planting in boggy areas or near embankments. Will tolerate drier conditions. Useful as a screening plant. Responds well to pruning. Food source for insects and birds.	White	Spring- Summer	2- 6m	1- 3m	Yes	Yes	
Large trees and shrubs	Melaleuca ericifolia	Swamp paperbark	Full sun - part shade	Likes moist to wet soil conditions. Frost tolerant. Useful as a hedge, smaller canopy or lower spreading in drier conditions. Habitat for frogs, and food for birds and other pollinators.	White	Spring	9m	2- 6m	Yes		
Large trees and shrubs	Melaleuca lanceolata	Moonah	Full sun- part shade	A hardy small tree, highly tolerant of most conditions. Best suited to coastal sites in any well- draining soil. Tolerant of wind, drought, salt, lime and frost	White	Spring, summer	3-8m	3-5m	Yes		
Large trees and shrubs	Melaleuca squarrosa	Scented Paperbark	Full sun - part shade	Grows best in damp, swampy soils. Tolerant of frost. Responds well to pruning. Flowers are highly scented. Attracts polinators.	Cream	Spring - Summer	2-10m	1 - 2m	Yes		
Large trees and shrubs	Myoporum insulare	Common boobialla	Full sun - part shade	A dense, fast growing shrub. Suitable for well draining soil. Can be useful for screening and windbreaks. Suited to coastal sites.	White	Spring- summer	4-7m	2-4m	Yes		
Large trees and shrubs	Olearia langinosa	Ghost town daisy bush	Full sun - part shade	Prefers well drained soil, can tolerate poor soil conditions. Responds well to pruning after flowering. Can tolerate light frost. Attracts insect pollinators	white	Spring	1m	1m	Yes	Yes	
Large trees and shrubs	Olearia lirata	Snow daisy bush	Part- full shade	Suited to moist, well drained soils in a shady position. Tolerant of frosts. Useful as a light screen. Food source for caterpillars.	White	Winter- Summer	4m	3m		Yes	y
Large trees and shrubs	Pomaderris paniculosa	Coast pomedarris	Full sun - part shade	Best suited to coastal conditions. Needs well draining soil. Great for hedging and protection from coastal winds. Suitable for poor nutrient soils. Attracts birds.	Pink	Spring	1-3m	1-2m	Yes	Yes	
Large trees and shrubs	Pultenea daphnoides	Large leaf bush pea	Part shade	An ornamental shrub suited to moist- well drained soils. Will tolerate moderate frosts. Can be used for underplanting. May require watering in warmer months. Can be hedged and reponds well to pruning	Yellow and brown	August- November	1- 3m	0.5- 2m	Yes		
Large trees and shrubs	Solanum aviculare	Red Kangaroo apple	Full sun - part shade	A fast growing pioneer plant with striking purple flowers and red berries. Perfect for a quick growing statement plant. Attracts frugivore birds. Berries poisonous when unripe	Purple	Spring- Summer	1-3m	1-4m	Yes		

Large trees and shrubs	Viminaria juncea	Golden Spray	Full sun - part shade	Fast growing shrub for poorly drained areas. Useful as a large foliage near wet areas including pools. Requires summer watering in drier conditions. Attracts insect pollinators and birds.	Yellow	Summer	2.5-5m	2-2.5m	Yes		
Lilies, grasses and tussocks	Arthropodium milleflorum	Vanilla Lily	Full sun - part shade	Low perrenial plant, can be grown and flowered in both sun and shade. Will become dormant in dry times. Drought and frost tolerant, and can survive in heavy shade.	White, blue, pink	Spring - Summer	1m	0.4m	Yes		
Lilies, grasses and tussocks	Arthropodium strictum	Chocolate Lily	Full sun - part shade	Preffer good drainage, frost tolerant. Will grow well in pots and under other established plants. Will die back to tubers in Summer.	Purple	Spring- Early summer	0.5m	0.8m	Yes		
Lilies, grasses and tussocks	Austrostipa stipoides	Coast spear grass	Full sun-part shade	A hardy tussock grass suitable to sandy- loam soils. Resisent to drought and saline environemnts. Useful for binding soil. Provides food source for birds and habitat for other wildlife.	White	Spring- Summer	1m	1m		Yes	
Lilies, grasses and tussocks	Bulbine bulbosa	Bulbine lily	Full sun - part shade	A fragrant flowering Lily suited to a range of soils from well draining- moist. Frost tolerant. Suppliment water in dry conditions or dormany will occur. Corms (tubers) are edible. Suitable for pots. Attracts pollinators.	Yellow	Spring- Autumn	0.8m	0.5m	Yes	Yes	
Lilies, grasses and tussocks	Carex appressa	Tall Sedge	Full sun - part shade	Perfect for any moist to wet areas. Great for stabilising damp pond edges, as well as purifying water. Good habitat for frogs.	Yellow to brown	Late winter- Summer	1m	1m	Yes		
Lilies, grasses and tussocks	Dianella longifolia	Pale flax lily	Full sun-part shade	A versatile sedge suitable for moist- drier well drained soils. Can be used for underplanting. Flowers sit above leaves. Edible purple berries.	Purple	Winter- Spring	0.8m	0.5m	Yes	Yes	
Lilies, grasses and tussocks	Dianella tasmanica	Tasman flax- lily	Part- full shade	A vigorous growing sedge perfect for planting under shade, esepcially in moist conditions. Will grow slower when dry. Frost and snow tolerant. Habitat for frogs and food for birds and caterpillars.	Purple	Winter- Summer	1.5m	2m	Yes		
Lilies, grasses and tussocks	Distichilis distchophylla	Australian salt grass	Full sun - part shade	Perrenial grass, coarse and prickly, growing in damp, saline areas such as the fringes of saltmarshes. It often forms mats where water is abundant.	Green	Spring - summer	0.3m	1m	Yes		
Lilies, grasses and tussocks	Ficinia nodosa	Knobby club-rush	Full sun - part shade	Grows well in most conditions with well- moderate soil drainage. Erosion control of sand. Suited to coastal areas. Drought and frost tolerant	Spiky brown	Spring - Summer	0.5-1.5m	0.5-2m	Yes	Yes	
Lilies, grasses and tussocks	Lomandra longifolia	Mat rush	Full sun- part shade	A hardy sedge suited to most soils types, moist-dry conditions. Can tolerate periods of drought. Bushtucker plant, tubers are edible and seeds can be ground into flour. Attracts pollinators	Yellow	Spring & Winter	1m	0.6m		Yes	
Lilies, grasses and tussocks	Poa labillardierei	Common Tussock grass	Full sun - part shade	Very versatile grass that thrives in a range of soil types and environments. Prefers any well- draining soil. Trim annually after flowering.	Cream	Spring - Summer	0.5 - 1m	0.5-1m	Yes	Yes	
Lilies, grasses and tussocks	Poa tenera	Slender Tussock- grass	Part- Full shade	Perfect groundcover grass for moist- moderate soil drainage areas. Important habitat and food source	Spiky brown	Spring - Summer	0.2m	spreading	Yes		

Lilies, grasses and tussocks	Rytidosperma caespitosum	Common Wallaby grass	Full sun - part shade	Suited to moist, well draining soils. Can be used in underplanting or as a lawn substitute. Frost tolerant. Attracts birds who consume the seeds.	Purple	Spring-Summer	0.4m	0.4m	Yes		
Lilies, grasses and tussocks	Rytidosperma geniculatum	Kneed wallaby grass	Full sun - part shade	Likes light moist- slightly dry soils. Useful for underplanting. Habbit is a smaller, finer leaved tussock. Could be planted as a lawn. Seeds provide food for birds	Purplish	Spring-Summer	0.4m	0.4m	Yes		
Semi-aquatic	Carex appressa	Tall sedge	Full sun- Part shade	Perfect for any moist to wet areas. Great for stabilising damp pond edges, as well as purifying water. Good habitat for frogs.	Yellow to brown	Late winter-Summer	1m	1m	Yes		
Semi-aquatic	Carex fascicularis	Tassel sedge	Full sun- Part shade	Grows on the edge of fresh and brackish water. Beautiful ornamental flower heads. Suitable for native ponds and water features. Habitat for frogs.	White- pale brown	Spring-Autumn	1m	0.75m	Yes		
Semi-aquatic	Eliocharis acuta	Common spike rush	Full sun - part shade	Aquatic in swamps, lake margins and along watercourses. Provides frog habitat in dams and ponds but will spread readily.	Dark brown	Spring- Autumn	0.3 - 0.9m	0.3 - 0.9m	Yes		
Semi-aquatic	Goodenia humilis	Swamp Goodenia	Full Sun	Great matting plant for semi -moist, well drained soils. Can also be partially or fully submerged in water. Perfect for rockeries or the sides of ponds and dams.	Yellow	Late Spring - early Autumn	0.2m	Spreading up to 1.5m	Yes		
Semi-aquatic	Hemarthria uncinata	Mat grass	Full sun - part shade	Suitable for planting in seasonally wet areas and beside water ways. Great for erosion control of dams. Clay, loam, sand soils. Tolerates moderate frosts and drought.	Green	Summer	0.8m	0.5m	Yes		
Semi-aquatic	Juncus kraussii	Sea rush	Full sun	Hardy rush great for erosion control of various soil types. Suited to salty environments. Important for biofiltration. Tolerates complete inundation as well as periods of drought.	Brown	Spring - summer	0.5-1m	0.5-1.5m	Yes		
Semi-aquatic	Juncus pallidus	Pale rush	Full sun- part shade	Suitable for seasonally wet to poorly draining soils. Great for use around pond and dam edges. Frog habitat. Seeds are also a food source for birds.	Pale green	Spring-Summer	2m	1m	Yes		
Semi-aquatic	Juncus pauciflora	Loose flower rush	Full Shade	Good perennial rush for stabilizing estuary banks and riparian zones. Prefers low-lying moisture retentive sites but tolerates extended dry periods. Valuable for bird and wildlife habitat.	Brown	Summer	0.3 - 1m	0.2 - 0.6m	Yes		
Semi-aquatic	Juncus planifolius	Broadleaf rush	Full sun- part shade	An interesting little rush for moist areas and edges of water features. Moist to wet soils and shallow water in ditches, pasture, swamps and watercourses.	Brown	Spring - Summer			Yes		
Semi-aquatic	Lobelia aceps	Angled lobelia	Semi- full shade	Best suited to moist soil conditions, perfect for bog gardens, beside ponds and wetlands. Does not like inundation. Great frog habitat. Sensitive to frost.	Light blue	Year round	0.3m	spreading		Yes	
Semi-aquatic	Marsilea drummondii	Nardoo	Full sun-part shade	Fast growing, spreading aquatic fern. Perfect for any damp-wet areas including ponds and dams. Important frog habitat. Attracts seed-eating birds	NA	NA	0.3m	3m	Yes		
Semi-aquatic	Mazus pumilio	Swamp mazus	Full sun- full shade	Suited to moist- wet soils around pond/ wetland margins. Great to plant to create ground cover in moist areas. Can be sensitive to frost and drought.	Purple	Spring-Autumn	0.1m	1m	Yes		

Semi-aquatic	Persicaria decipiens	Slender Knotweed	Full sun - part shade	Beautiful spreading plant for moist- wet areas. Perfect for dams, ponds and seasonally wet areas. Great waterbird habitat.	Pink	Summer - Autumn	0.3-1m	spreading	Yes		
Semi-aquatic	Philydrum lanuginosum	Wooly frogmouth	Full sun - part shade	A freshwater plant suited to the edges of ponds or dams. Useful for stabilising soil. Can tolerate inundation and dry periods. Provides habitat to an array of wildlife.	Yellow	Summer- Autumn	1m	0.5m	Yes		
Semi-aquatic	Ranunculus inundatus	River buttercup	Full sun - part shade	Requires moist soil. Perfect for ponds and dams. Can be planted beside ponds and dams, or partially submerged in shallow water. Tolerant of frost. Good frog habitat.	Yellow	Spring- Summer	0.1-0.3m	spreading	Yes		
Semi-aquatic	Ranunculus papulentus	Large river buttercup	Full sun - part shade	A vigorous growing plant suited to moist- wet soils. Perfect for the edges of ponds or dams. Tolerant of frost and inundation	Yellow	Summer	0.2m	Spreading	Yes		
Semi-aquatic	Schoenus nitens	Shiny Bog-rush	Full sun	Suitable for damp. Well- drained soil. Will tolerate seasonally wet environments and coastal conditions. Prevents soil erosion and can provide habitat for frogs, fish and invertebrates	Red-brown	Spring - Summer	0.3m	spreading	Yes		
Semi-aquatic	Selliera radicans	Shiny Swamp- mat	Full sun- Full shade	Great ground cover for bog gardens, next to ponds or wetlands. Excellent soil binder for embankments. Will tolerate waterlogging. Good frog habitat.	Mauve	Spring- Summer	0.4m	spreading	Yes		
Small shrubs	Adriana quadripartita	Coastal bitter bush	Full sun -part shade	A small shrub suited to coastal positions. Unusual flowers provide the only food source for the bitterbush blue butterfly. Plants are either male or female. Great for binding soil and preventing erosion. This plant is listed as endangered in victoria.	Orange/ green	Spring- Summer	2m	3m	Yes		
Small shrubs	Atriplex cinerea	Coast saltbush	Full sun -part shade	A larger saltbush suited to well- drained soils. Best suited to coastal conditions. Leaves are edible. Lightly prune after flowering. Attracts butterflies and birds.	Purple	Winter- Summer	1-2m	1-3m	Yes	Yes	
Small shrubs	Atriplex paludosa	Marsh Saltbush	Full sun - part shade	Very adaptable to most soil types and conditions. Tolerates salt, drought and frost. Important food source for caterpillars. Fire retardant	Cream	Spring	1-2m	1-2m	Yes		
Small shrubs	Chenopodium candolleanum	Seaberry Saltbush	Full sun - full shade	A spreading shrub, suited to dryer soils. Tolerates drought, lime, moderate frosts, soil salinity, salt spray and fire retardant. Fleshy berries are edible. Provides great habitat and food for birds, lizards and caterpillars.	Green	Spring - summer	0.1 - 1m	1.5 - 2m	Yes		
Small shrubs	Correa alba	White Correa	Full sun - part shade	Extremely hardy, will tolerate most reasonably well-drained soils. Very resistant to salt spray. Suitable for pots and as hedge. Provides dense habitat for small mammals and animals. Attracts nectar eating birds and insects	White	Late autumn - winter	1.5m	1-1.5m	Yes		

Small shrubs	Correa reflexa	Common Correa	Shade - full sun	A hardy shrub that prefers partial shade. Will have a more open spreading habit in full shade. Suited to any well-draining soil. Attracts nectar eating birds.	Yellow green or pink with yellow tips	Late autumn - spring	1m	1.5m	Yes		
Small shrubs	Goodenia ovata	Hop Goodenia	Full sun - part shade	An extremely hardy shrub. Great for any position. Will grow under established trees. Likes damp- moist soil and will tolerate waterlogging.	Yellow	Spring - summer	1-2.5m	1-3m	Yes	Yes	
Small shrubs	Indigofera australis	Austral Indigo	Full sun - part shade	A hardy shrub suitable for a range of soils including nutrient poor. Frost and drought tolerant. Responds well to light pruning. Important nectar source for insects.	Purple	Spring	1-2.5m	1-2m	Yes	Yes	
Small shrubs	Olearia axillaris	Coastal daisy-bush	Full sun	Erect bushy shrub suitable for sandy/coastal soils. Attracts pollinators, salt and drought tolerant.	White / yellow centres	Summer - Autumn	0.5 - 3m	1-2m	Yes	Yes	
Small shrubs	Olearia glutinosa	Sticky Daisy-bush	Full sun - part shade	Suited to well drained, sandy soil. Responds well to pruning after flowering. Tolerant of drought and salinity.	White	Summer	2m	1- 2.5m	Yes		
Small shrubs	Ozothamnus turbinatus	Coast everlasting	Full sun - part shade	Likes well drained soils, suited to coastal areas. Useful for erosion control. Salt and drought tolerant. Important food source for pollinating insects.	White	Summer	1.2m	1.2m	Yes		
Small shrubs	Pultenea gunnii	Golden bush pea	Full sun	Low spreading shrub suitable for well drained sandy soils. Attracts pollinators.	Yellow	Spring - Summer	0.3 - 1m	0.5 - 1.5m		Yes	
Small shrubs	Tetralathea ciliata	Pink Bells	Part shade - full shade	A small shrub with gorgeous foliage and flowers. Suited to moist- well draining soils. Perfect for small gardens, cottage gardens. Good for pots and underplanting.	Mauve-Pink	Winter-Spring	0.3m-0.6m	0.3m-0.6m	Yes
